

# \$7.95 Marketing Plan - How To Choose Memorable & Powerful Domain Names

Names matter, especially domain names. The right name can make or break your business or brand. Do you know the secret formula to discovering and coming up with awesome domain names? The \$7.95 Marketing Plan will show you how to come up with mind-blowing, memorable names that people will NOT forget. This book has been read by hundreds of thousands of people and is your guidebook to success. Stop! Don't buy a domain name until you read this book first. From the Author...I've always been fascinated and entertained by fun, memorable domain names. Well, not just the domains, but the actual businesses and the ROI behind them as well. If a domain name is used well together with a creative idea, you can create a killer marketing campaign that can skyrocket your sales, leads and publicity for your business or brand. And that my dear reader is the entire short premise of this book. It's brilliant really. Think about it. For the low cost of under \$10.00, you can build an explosive, and memorable creative marketing campaign that will get customers to remember who you are. It doesn't get simpler than this, or cheaper. Using a domain name to market your new idea, or your business, or to review an old project or whatever, is simply a smart thing to do. This book is written to not only inspire you into taking action, but also to help you understand how others are doing it and how you can do it too. But is it really a marketing plan? By no means is the \$7.95 Marketing Plan a real marketing plan. My apologies to all the MBAs out there who fell off their chairs when you saw the title of this book. Of course it's not a real marketing plan in the true definition. (Frankly, we think those are overrated in my most cases anyway). However, if you're so inclined to be one of those people who feel the need to have a full marketing plan in place then I highly recommend you do that. You're just

not going to get that kind of crazy talk here where we do things willy-nilly (thats a highly technical term for half-assed).For me, well, Im more of a lets throw it up there and see if it sticks kind of marketing guy. Not only does this allow me to move faster than well, everyone else, but it also allows me to fail more often than most. And to me, failure is just another step toward success. So if youre like me, be warned, moving ahead on frivolous marketing campaigns as described in this text can be a risk to your long-term success. There, I said it. Im covered now right? Im sure the MBAs still hate me. But then again in my defense Doing it my way is way more fun and sometimes, more rewarding. Especially when you just catch lightning in a bottle and even more so when it only cost you only \$7.95. :)

Find Best 2018 Web Hosting providers using price comparisons and reviews HostGator is a full-service hosting company, with plans for almost any need. to customize their dedicated or virtual server, but also to choose Linux or along with a full e-commerce stack, domain name registration, Office 365 Learn about the ten best blogging platforms and which one is best for While there are many options for blogging, serious bloggers almost always choose WordPress as their All annual accounts get a free domain name True 24/7 support: . component of every website and company marketing plan.
