

# Janes Airport Equipment & Services 2015 2016: Yearbook (Janes Airport Equipment and Services)

Janes Airports, Equipment and Services, the definitive industry standard, is the essential global reference source for airport and airline decision makers. Indeed in some Asian countries, it is mandatory for a manufacturer's products to be detailed here in order to qualify to tender for airport contracts. Reviews and analyses of products and services from over 1,900 specialist airport contractors provide a comprehensive overview of what is available, including new developments, installations and projects. Details include tow tractors and emergency vehicles to security systems and maintenance equipment, company details, key personnel, how equipment and systems work, and information on planning, design, construction, security and management services.
