

Now updated and reorganized, Alan Shapiro's Foundations of Multinational Financial Management, 6/e emphasizes broad concepts and practices, and provides a clear conceptual framework for analyzing key financial decisions in multinational firms. The text treats international financial management as a natural and logical extension of the principles learned in the foundations course in financial management. Thus, it builds on and extends the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance. Shapiro 6e is primarily intended for an undergraduate audience; but it is suitable for use in masters-level courses when there is not time to cover the full range of topics. This text assumes no prior knowledge of international finance.
