

Human Being Self Analysis Kit

In this book, the author sets out to quantify what he believes to be all the important aspects that you need to know about yourself. The tests he sets out are completely different from the sorts of tests you see in Western medical, nursing and psychiatric books. Even the intelligence test he gives is very different. It is a comprehensive book. The tests cover the following topics - physical health, sexual health, emotional health, mental health, love health, spiritual health and your specific relationship with divinity.
