

How a Star Falls

Sweet New Adult Contemporary Romance Novella How does a star fall? Quickly. Completely. Unexpectedly. Derrick Knolane escapes to Trinidad Head most evenings, avoiding his apartment and planning for the day he'll break free of Humboldt County. Working in a music store might be fine for a while, but it's far from the goal he had in mind when he got his college degree. Not to mention the fact that his roommate is a jerk and his family won't stop trying to run his life. Then Brielle falls into his world. She claims to be a star. Not from Hollywood, but from heaven. He thinks she's crazy. Certainly delusional. Yet, he can't just leave her alone on the cliffs. So he takes her home. And his whole world falls apart. A heartfelt and fanciful contemporary romance novella, *How a Star Falls* explores the uncertain season of new adulthood and shows that sometimes the worst inconveniences make for the best miracles of all.

- 200 min - Uploaded by Saving ThrowSession 0 of a brand new campaign following the classic AD&D adventure module *When a Star Falls* - 1 min - Uploaded by SweetHighTaylor Audette caught up with Siena Agudong and Kamaia Fairburn and talked about how their *A falling star* or shooting star isn't actually a star - it's just a piece of rock burning up as it hits Earth's atmosphere. When they hit the atmosphere, the friction of travelling through the air so quickly makes them heat up, break up and glow very brightly. This is called a meteor. - 3 min - Uploaded by e in el monte CA its 5:39 am and i saw the shooting star around 5:30 I have seen a - 5 min - Uploaded by tina13261Mathou - *When a star falls.* tina13261.
